

## Description

Metal part for the creation of adjustable angle level changes with Megaband® ladder, by using m8 bolts and hexagonal nuts whilst also maintaining the electrical continuity, according to IEC 61537.

## Advantages

Thanks to the articulation it allows the creation of level changes.

Requires M8 hexagonal bolts and nuts.

Also compatible with Pemsaband® One perforated and solid sheet trays.

Electrical continuity guaranteed according to standard IEC61537.

Available in various protection systems: EZ, GC and stainless steel AISI 304 and AISI 316L.

## Applications

The Megaband® ladder is designed to be able to make level changes of cable management in electrical and telecommunications installations in public buildings, infrastructures and civil works, tertiary sector and industrial applications. Compatibility with the Pemsaband® One perforated and solid ranges.
