Rejiband Joints

Fast Click Base Joint

Description

Component for specifically joining the base of sections of trays using the Click system. It is suitable for Rejiband trays of 300 to 600 mm width and heights of 60 and 100 mm, with surface protection. It is assembled without the need for any special tools and allows the joining between sections of Rejiband trays in less time, ensuring the mechanical strength of the joint and electrical continuity, according to IEC61537 standard. Made of steel and available in various Protection Systems.

Advantages

Fast installation on the tray without screws.

Simple and quick assembly without the need of special tools.

80% saving in installation time.

Electrical continuity guaranteed according to standard IEC61537.

Available in various protection systems: EZ, BC, GC or high resistance BK8, depending on the type of application.

Applications

Suitable for the fast connection of Rejiband trays in electrical and/or telecommunications installations in: Civil works, Tunnels, Car Parks, Public Buildings, Shopping Centres, Large Infrastructures, Airports, Metro Lines, Railway. Tertiary Sector and industrial applications: Naval, Petrochemical, Textile, Chemical, Food.
