

Articulates Riser Section MEGAband

Description

Articulated metal accessory consisting of a straight section with two welded crosspieces, with safety edge for the creation of a level change in the Megaband® ladder. It allows to make rises, drops and changes of height in variable angles of 15, 30, 45 and 90°. Quick connection assembly using the click system, without joints. Made of steel in various sizes and Protection Systems.

Advantages

Use in conjunction with Megaband® articulated riser plates and Megaband® M8 joint kit or M8 nuts and bolts.

Curved safety edge which offers maximum protection.

The angle is variable by 15°, 30°, 45° and 90°. Sections can be coupled together to provide a greater radius for large cables.

Electrical continuity guaranteed according to standard IEC61537.

Available in various protection systems: GC and stainless steel AISI304 and AISI316L.

Applications

Suitable for level changes in cable management in Megaband® ladders in electrical and telecommunications installations in public buildings, infrastructures and civil works, industrial facilities, tertiary sector.
