Description

60 mm high steel wire mesh tray with surface protection and safety edge for the support and management of electric cables in false ceilings. It is fixed to the ceiling without additional support by using just the Rejitech fastener. It has an open structure that allows the lateral introduction of the cables therefore reducing the installation time. It is supplied in 2 m lengths.

Advantages

Direct fixing to the ceiling without additional support by using just the Rejitech Fastener.

Cables are kept tidy and with maximum ventilation.

Installation in false ceilings or confined spaces.

Quick installation by just one person.

It installs quickly without the need for joints or bends.

Applications

Suitable for the management and distribution of cables in electrical and/or telecommunications in industrial installations, Civil Works and Infrastructures, tunnels and inspection galleries. It is mainly used for installations in false ceilings due to its height of 60 mm allowing it to be accommodated in reduced spaces.
