Rejiband Radius Support (Ref: 82003455)

Description

Accessory that improves and ensures the creation of bends in Rejiband wire mesh trays for data cable installations and Data Centers. Of 150 mm height, With GC protection system. Thanks to its design, it protects the curvature of the cables by guiding them during changes or flat turns. Made of steel, available in various protection systems.

Advantages

Suitable for cable trays with 60 and 100 mm height

CE certified in compliance with the low voltage directive 2014/35 / EU and international product standard IEC 61537

Available in PG, BK8 and GC protection systems

Maximum protection of the wiring in the bends or changes of planes.

Improves and ensures the creation of bends in Rejiband wire mesh trays for data cable installations and Data Centers

Applications

Suitable for the protection of bends in Rejiband® wire mesh tray for routing cables in electrical and telecommunications installations in industrial facilities, infrastructure and civil works, service sector and especially designed for data cable installations and Data Centers.
