Variable Ceiling Rod Bracket

Description

Adjustable metal bracket for the ceiling mounting of Rejiband® wire mesh trays and Pemsaband® sheet trays with a M8 or M10 threaded rod. Easy orientation of the fixing of the necessary angle in electrical or telecommunications installations. Made of steel and GC Protection System.

Advantages

Connection with M8 or M10 threaded rod using hexagonal nuts.

Suitable for the support of all ranges of cable trays.

Suitable for sloping ceiling installations with confined spaces, thanks to its reduced dimensions.

CE conformity to directive 2014/35 / EU.

GC protection system (standard UNE-EN ISO 1461), suitable for outdoor installations and in aggressive environments. Corrosion resistance class 6.

Applications

Suitable for supporting medium loads of cable trays to the ceiling by means of a variable angled rod for electrical installations and / or of telecommunications in: Civil works, tunnels, car parks, public buildings, commercial centres, large infrastructures such as: Airports, underground, rail, tertiary sector, industrial naval, petrochemical, textile, chemical and food applications.
