Ceiling Channel Metatray

Description

Perforated channel for ceiling, wall and floor installation of Metatray® insulated cable trays for the conduction of electrical and telecommunication cables. Made of PVC-based thermoplastic insulating material. Colour grey RAL 7035.

Advantages

It has perforations for the insertion of Conduit clip and clip joint kit facilitating the installation of insulating cable trays and rigid conduits.

Insulating material, electrical safety and reduced maintenance costs.

Excellent performance in corrosive environments, weather and exposure to UV radiation.

Non-flame-propagating. Reaction to fire, V0 grade and M1 classification

Aenor N mark on product standards EN 61537 and EN 50085. CE compliance with directive 2014/35/EU.

Applications

Suitable as a support for ceiling, wall and floor installation, for the conduction of cables in electrical and telecommunications installations in different sectors, from wastewater treatment plants to the chemical and petrochemical industry, establishing itself as a highly corrosion-resistant solution that complies with the most demanding standards. Likewise, its application is also ideal in other different sectors: solar roofs, self-consumption, tertiary, telecommunications, electric mobility through vehicle charging stations, etc.
