

Description

Steel wire mesh tray with heights of 60 and 100 mm, surface protection and safety edge. Of 60 mm height, Width 60 mm, With CU protection system. Used in industrial installations for the support and management of electric cables in false ceilings, confined spaces and on walls. The ease of installation is thanks to the Click quick connect system that requires no fixings for supports and accessories. It requires no additional support and is attached to the ceiling and walls by using just the Rejitech fixing. It has an open structure that allows the lateral introduction of the cables therefore reducing the installation time. Available in different sizes and Protection Systems. It is supplied in 3 m lengths. Manufacturing according to international standard IEC 61537.

Advantages

Cables are kept tidy and with maximum ventilation.

Direct fixing to the ceiling without additional support by using just the Rejitech Fastener.

Installation in false ceilings or confined spaces.

Quick installation by just one person.

It installs quickly without the need for joints or bends.

Applications

Suitable for the management and distribution of cables in electrical and/or telecommunications in industrial installations, Civil Works and Infrastructures, tunnels and inspection galleries. It is mainly used for installations in false ceilings due to its height of 60 mm allowing it to be accommodated in reduced spaces.
