Bolt Croppers (Ref: 68000058)

Description

Bolt Cropper for Rejiband® trays to make asymmetrical cuts. Indispensable tool for the "Cut, Bend and Join" system that allows the creation of bends, risers etc. by using the normal straight sections of Rejiband®.

Advantages

The asymmetrical cut allows the self-repair of the finish.

Easy adaptation of the Rejiband tray and wiring to suit the needs of the installation.

Lightweight and easy to use.

Better protection than when using other cross-cut or radial cutters that destroy the protective finish.

Quick creation of accessories, bends, level changes etc. with the Rejiband® tray.

Applications

Suitable for making asymmetrical cuts in the Rejiband® wire mesh tray to create the necessary accessories, such as bends, level changes, reducers etc., to adapt and meet the needs of the installation.
