Metatray T-joint

Description

Fitting for the construction of T-joints or crossovers of Metatray® insulating trays for the conduction of electrical and telecommunication cables. Made of PVC-based thermoplastic insulating material. Colour grey RAL 7035.

Advantages

Versatile connector that facilitates the creation of T-Joints and Crossover junctions with a single reference.

Insulating material, electrical safety and reduced maintenance costs.

Excellent performance in corrosive environments, weather and exposure to UV radiation.

Non-flame-propagating. Reaction to fire, V0 grade and M1 classification

Applications

Suitable for the construction of T-branches and crossings for cable management in electrical and telecommunications installations in different sectors, from wastewater treatment plants to the chemical and petrochemical industry, establishing itself as a highly corrosion-resistant solution that complies with the most demanding standards. Likewise, its application is also ideal in other different sectors: solar roofs, self-consumption, tertiary, telecommunications, electric mobility through vehicle charging stations, etc.
